

MATHEMATICS DREAD DECODED

CBSE Workshop on Importance of Mathematics was conducted at DPS Panipat City on 24 November 2017 in which Maths Faculty members from various schools participated with fervour. The main focus was to remove the students' eternal fear of maths and replace it with healthy inquisitiveness. The Chief Resource Person was Mr. Neeraj Saxena, an eminent mathematician. Mr. Saxena emphasized on Conceptual Learning. He stressed on the need to spread awareness of the utility of mathematics as an instrument in almost all the subjects and also suggested to the mentors for developing the feel of success and not the terror of failure in children for Maths. He highlighted the importance of maths in developing critical and logical thinking, daily estimations and enhancing creativity. The workshop was highly enriching and was a great source of inspiration amongst participating staff members.

The Principal, Ms. Archana Jain encouraged the teachers to run-through these tips in their regular teaching classes which would eliminate trepidation for maths and help the students in other subjects as well.
